SKILLS

SYSTEM MODELLING

CONTROL SYSTEMS & SERVOMECHANISMS

ELECTRICAL ENGINEERING

ALGORITHMIC PROGRAMMING

COMMUNICATION

EDUCATION

EDUCATION ENGINEERING DEGREE — STUDENT STATUS (FISE)

Department of Electrical Engineering, Electrical Energy & Automation (3EA)
ENSEEIHT, Toulouse

2026 - Present

PREPARATORY CLASSES FOR THE GRANDES ÉCOLES (CPGE)

Physics & Engineering Science track (PSI)
Lycée Chateaubriand & Joliot-Curie, Rennes

2024 - 2026

BACCALAURÉAT (FRENCH HIGH SCHOOL DIPLOMA) — HIGHEST HONOURS

Expert Mathematics specialization
Lycée de l'Elorn, Landerneau

2021 - 2024

DRIVING LICENCE B

PROFILE & OBJECTIVES

As a FISE 3EA student, rigorous and used to a demanding academic environment, I have solid skills in mathematics, physics and engineering sciences. As part of the engineering curriculum of the Department of Electrical Engineering, Electrical Energy and Automation, I now want to orient my career towards industrial machine retrofitting, a fast-growing economic sector where preserving existing resources creates real value.

EXPERIENCE

2026 - 2025 — **TIPE – Site decontamination using metal detectors**

Collaborative project in electrical engineering – CPGE

- Design and analysis of electrical circuits and experimental protocols
- Signal processing using oscilloscope and Python
- Technical problem-solving

July 2025 - May 2024 — **Independent developer – Roblox**

Personal software development project

- Complete design of a game in Lua (Roblox Studio)
- Modular code architecture and dynamic interaction management
- Performance optimization and autonomous resolution of algorithmic challenges
- Published project, available on the platform and tested by 2,000+ users

INTERNATIONAL EXPOSURE

October 2025 — **Independent trip across Europe**

3 countries, 9 days

- Full logistical planning and budget management
- Adapting to unexpected situations
- Communication in English
